

$SO(3)$ as a ball: direction the axis, distance the angle

$\mathbf{X}_0$ in its body frame

... twelve sheets, one per rotation of T

the third-turn
about bond 1

a half-turn,
on the skin

the twelve rotations of T : the centre,
a cube of third-turns, three on the skin;
one cell $\mathcal{U}$ and the lift $r \rightarrow r\mathbf{R}_g$
