

Configurations and States

§§ 1–3 a configuration is a point of $\mathcal{C}$

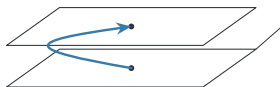

Symmetry and Localization

§§ 7–9 species on the versions, a packet on one of them

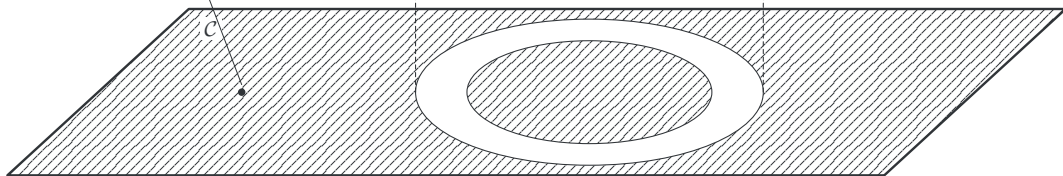

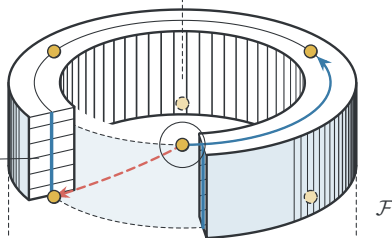

Representations and Global Structure

§§ 10–12 charts, sheets and modes over the versions

Fragments and Feasible Regimes

§§ 4–6 $\mathcal{F}$ carved out of $\mathcal{C}$, its versions on the band

read outside in: the configuration space is carved to the feasible solid, the solid to its versions, the versions to their sheets; hatching marks what each cut removes
